THE LEAK

The line only goes *one way*.

WHAT'S GOING WRONG

Five things, one root cause.

- 1

The audience is leaving faster than it arrives

Every single day in the last two weeks closed negative — an average of **-51/day, -1,523 a month**. The audience you paid (in years of effort) to build is draining out the bottom.
- 2

Engagement has flatlined

230K followers, but Socialblade registers **no measurable engagement rate** and can't even assign a rank. When likes and comments go quiet, the algorithm stops trusting the account and quietly caps its reach — which is exactly what the follower graph shows.
- 3

The content is generic AI — indistinguishable from 10,000 other money pages

AI-rendered mentors, a fake Buffett, recycled "billionaire habits" hooks. Nothing on the grid answers **"why this page?"** — so there's no reason to follow, stay, or share. Sameness is invisible to the algorithm.
- 4

Volume without a system

1,510 posts and climbing, but every post is a one-off. **No recurring series, no CTA pulling people deeper, no retention loop**. Huge effort goes in and nothing compounds.
- 5

Static carousels in a Reels game

The reach that replaces churn now comes from **Reels riding trending audio**. A feed of static AI carousels simply can't out-run the daily bleed.

WHAT WE'D CHANGE

Same account. *Different engine*.

TODAY	UNDER PAGESCALING
NOW Recycled "billionaire" hooks seen everywhere	FIXED Scroll-stopping hooks written for the first 3 seconds — the single highest-leverage change
NOW Static AI carousels, flat reach	FIXED Reels + trending sounds to reopen reach and pull in new followers daily
NOW One-off posts, nothing returns	FIXED A retention loop — recurring series + clear CTAs so followers come back and convert
NOW Posting by gut, no plan	FIXED A managed content system — everything planned in a shared board you can watch
NOW No idea why the number drops	FIXED A monthly report — so the line turns and you can see exactly why

TARGET AFTER THE FIX

+4,500/mo

growing

Illustrative target for a 230K account moving from -51 to +150 net/day — a directional goal, not a guaranteed number. We promise the system and the work; growth is the outcome of it.

You already have the audience. *Let's stop the leak.*
