THE STALL

Growth didn't slow — it stopped.

THE HONEST READ

One thing stalled — and it's the fixable one.

- ✓

You've built the whole stack — this is rare

A real face (Matt), a live funnel (wealtfolio.io + a free lead magnet), and genuinely sharp educational carousels — SpaceX, Amazon, credit-card debt, all strong hooks. **Most pages never assemble this.** It's exactly why the fix is narrow.
- 1

Growth has flatlined

+600 over 30 days but only **+132 in the last 14**, and the daily count has crashed from +27 to +4 with a negative day. This isn't a slow season — it's a plateau that's sharpening week over week.
- 2

Carousels retain — they don't reach

The feed leans on "swipe" carousels: perfect for the people who already follow, weak for finding new ones. Discovery on Instagram now runs on **Reels** — and without them, new-follower growth stalls in exactly this pattern.
- 3

Thin conversation caps the ceiling

~598 likes but only **~5 comments** a post. Comments, saves and shares are what push a post beyond your own followers. Without that signal, even great content stays trapped inside the current 37.8K.
- 4

A great funnel being starved

The site and the free lessons are exactly right — but a funnel is only as strong as the traffic on top of it. At **~7 new followers a day**, the whole machine slows. The bottleneck isn't the offer; it's the reach feeding it.

WHAT WE'D CHANGE

Keep it all. Turn reach back on.

TODAY	UNDER PAGESCALING
NOW Carousel-led feed, discovery stalled	ADDED A Reels engine on top of the carousels — reopening discovery to new audiences
NOW 598 likes, ~5 comments	FIXED Hooks & CTAs built for saves, shares & comments — the signals that break past your followers
KEEP Your strong educational carousels	REPURPOSED Kept — and cut into Reels so the same great ideas earn reach, not just retention
NOW Funnel starved at ~7/day	FED Restored growth pointed at wealtfolio.io — more of the right people into your lead magnet
NOW Plateau, unmanaged	FIXED A managed content system + monthly report watching the daily-adds line climb again

THE UNLOCK

Restart the growth line.

TARGET WITH REELS

+50–100

discovery reopened

Illustrative target for a Reels-led relaunch of a 37.8K niche page – a directional goal, not a guaranteed number. We promise the system and the work; growth is the outcome of it.

You did the hard part already. Let's turn the growth back on.

Face, funnel, content — you've built what most creators never do. The only missing piece is reach, and it's the most fixable one. Give me 15 minutes and I'll show you the Reels plan that restarts the line.
