THE COOLING

The growth curve just turned down.

THE HONEST READ

Two gaps, both about what happens next.

- ✓

The reach and engagement are elite — keep them

270K followers, **7.73% engagement**, **~20,900 likes a post**. Story-driven Reels, sharp hooks. This is a top-tier attention machine — nothing here needs “fixing.” The gaps are about protecting and owning it.
- 1

Growth is cooling fast

Daily adds have fallen from **+799 to +65** in under two weeks — an ~8x drop. Still positive, but the curve has clearly turned. Aggregated-clip pages plateau quickly once the format fatigues; without fresh hooks the green days keep shrinking.
- 2

Everything is rented

Instagram plus a YouTube link — but **no email or owned list**. Two algorithms own your entire audience; one change to either and the reach vanishes. Right now there’s nothing you actually control.
- 3

Credited clips, no owned IP

The content is other creators’ footage — “Media: moreperfectunion,” “LitecoinTA.” Excellent curation, but no face, no product, no proprietary asset.
The moat is the editing, and editing can be copied.
- 4

Huge likes, thin conversation

~20,900 likes but only ~39 comments a post. Passive reach is enormous; **community is shallow**. Comments and DMs are where loyalty and sales conversations live — and that layer is barely touched.

WITH A LIST + OFFER

Owned & monetised

on your terms

The reach is elite and real; the gap is that none of it is owned or protected. A directional plan, not a guaranteed number — we promise the system and the build; the revenue is the outcome of it.

You've built elite reach. *Let's protect it and own it.*

Your content is better than most of what we manage — this isn't about fixing it. It's about reigniting the growth that just started cooling, and turning 270K of rented attention into something you actually keep. 15 minutes and I'll show you how.
